PROFESSIONAL SUMMARY

Full Stack Developer with 2 years of professional experience building and shipping production web applications end-to-end: responsive React.js/Next.js interfaces, Node.js/Express REST APIs, database design, and secure authentication with role-based access control. Experienced in delivering complete features from UI to backend integration, working with MongoDB, PostgreSQL and MySQL, and collaborating in cross-functional Agile teams using a Git-based workflow. Strong debugging and troubleshooting skills, seeking to contribute to end-to-end digital solutions in your origination.

TECHNICAL SKILLS

Frontend: React.js, Next.js (SSR & CSR), TypeScript, JavaScript (ES6+), Redux, React Query, React Hooks, HTML5, CSS3, Tailwind CSS, Responsive Design

Backend & APIs: Node.js, Express.js, RESTful API Design & Integration, JWT/OAuth Authentication, Role-Based Access Control (RBAC), Laravel

Databases: MongoDB (Mongoose), PostgreSQL, MySQL, Schema Design & Query Optimization

Tools & Delivery: Git/GitHub, Docker, Postman, Vercel, Agile/Scrum, CI/CD-aware deployment workflows

PROFESSIONAL EXPERIENCE

MERN Stack Developer — Maze Digital

Feb 2025 – Aug 2026

- Developed end-to-end features across the stack, integrating React.js/Next.js frontends with Node.js/Express REST APIs.
- Designed, built, and maintained RESTful APIs with secure JWT/OAuth authentication and role-based access control (RBAC).
- Designed and optimized MongoDB schemas for scalability, high availability, and efficient querying.
- Built reusable, responsive React.js components and custom hooks that improved UI consistency and interactivity.
- Collaborated with cross-functional teams to turn business requirements into clean, high-performing solutions; debugged and resolved issues across frontend and backend.

Front-End Developer — TruSoft Technology

Jan 2024 – Dec 2024

- Developed and maintained responsive web applications with React.js and Next.js across multiple client projects.
- Worked closely with backend teams on API consumption and data flow to ensure smooth frontend-backend integration.
- Implemented Next.js routing and server-side rendering (SSR) to improve SEO and load performance; optimized component rendering and page load times.

RELEVANT PROJECTS

- Real Estate CRM** (github.com/Yasir-dev-Ali/Real-Estate-CRM) — MERN-based RESTful backend API for managing leads, clients, and property records, with MongoDB data modeling and structured CRUD endpoints.
- Team Task Management System** — MERN application with JWT authentication, role-based access, MongoDB aggregation for dashboard statistics, and a React/Vite/Tailwind frontend.
- The Collingwood Press** (thecollingwoodpress.com) — Developed and deployed a responsive production website with a component-based React front end.
- Graphic Grids** (graphicgrids.com) — Built and deployed an Astro.js application with component-driven architecture and centralized state management.
- Mobile App Portfolio** (React Native / Expo) — Habit Tracker, Receipt Scanner, and To-Do apps demonstrating component architecture and state management (details on GitHub).

EDUCATION & CERTIFICATIONS

BSc in Software Engineering — Indus University, Karachi

2021 – 2025

MERN Stack Training — Hazza Institute of Technology, Karachi

Oct 2023 – Oct 2024

Back-End Development Training — Decotech, Karachi

Jul 2024 – Oct 2024
