PROFESSIONAL SUMMARY

Front-End focused MERN Stack Developer with 1+ years of professional experience building responsive, high-performance user interfaces with React.js, JavaScript (ES6+), and modern CSS frameworks. Promoted from Intern to full-time Developer at Maze Digital for consistently shipping reliable, polished features. Skilled at translating designs into clean, reusable React components, working with RESTful APIs, and optimizing UI performance and responsiveness across devices. Comfortable working independently in fast-paced, on-site environments and collaborating closely with backend, QA, and design teams.

TECHNICAL SKILLS

Front-End: React.js, Next.js, Redux, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Responsive Design

Back-End: Node.js, Express.js, RESTful API Design & Development, Laravel

Databases: MongoDB (Mongoose), MySQL, SQL, Schema Design & Query Optimization

Auth & Security: JWT, OAuth, Role-Based Access Control

Tools & Practices: Git, GitHub, Postman, VS Code, npm, Vercel, Agile/Scrum, Debugging & Problem-Solving

PROFESSIONAL EXPERIENCE

MERN Stack Developer — Maze Digital

Feb 2025 – Present

- Build and maintain responsive, high-performance user interfaces with React.js, translating designs into clean, reusable components.
- Develop and integrate RESTful APIs with Node.js, Express, and MongoDB to ensure seamless communication between frontend and backend systems.
- Implement secure authentication and authorization using JWT and OAuth, enforcing role-based access control across the UI and API layers.
- Design and optimize MongoDB database schemas for scalability, high availability, and efficient querying.
- Collaborate with cross-functional teams (frontend, backend, QA) to streamline workflows and deliver new features from concept to deployment.
- Debug, troubleshoot, and optimize applications to improve front-end performance, responsiveness, and overall user experience.

MERN Stack Developer Intern — Maze Digital

Dec 2024 – Feb 2025

- Built and enhanced responsive React.js components, improving UI/UX and interactivity.
- Assisted in developing and maintaining RESTful APIs, ensuring smooth integration with frontend systems under senior engineer guidance.
- Gained hands-on experience implementing JWT/OAuth-based authentication and authorization.
- Supported testing and debugging cycles that improved application reliability, earning conversion to a full-time role.

RELEVANT PROJECTS

Make Hashtag — makehashtag.com

- Built and deployed live React.js applications, including a Redux-based state management demo, with a fully responsive UI.

Recipe Sharing API — github.com/Yasir-dev-Ali/Recipe-Sharing-API

- Built a MERN-based RESTful backend API for creating, sharing, and managing recipes, with MongoDB data modeling and structured CRUD endpoints.

Collingwood Press Publishing Platform -thecollingwoodpress.com/

Developed a scalable full-stack Next.js web application with secure authentication, API integration,

EDUCATION & CERTIFICATIONS

BSc in Software Engineering — Indus University, Karachi (2021 – 2025)

MERN Stack Training — Hazza Institute of Technology, Karachi (Oct 2023 – Oct 2024)

Back-End Development Training — Decotech, Karachi (Jul 2024 – Oct 2024)
